

The Gorilla SSP[®] Enrichment Database

Name of Item: Raisin Board

Submitted by: Zoo Atlanta

Items Needed:

1. Lexan or very thick cutting board material
2. 5/16 drill bit
3. Table saw
4. Sander

Construction Directions:

1. Cut lexan to desired length and shape
2. Sand and round off the sides and edges
3. Drill holes all the way through the lexan
4. Stuff with raisins
5. Distribute or freeze (freezing makes it harder to get the raisins out)

Lexan can be ordered online or check with your maintenance department. Thick plastic cutting boards can also be purchased online.
